Art Unit: 1616

Non-Final Office Action

Finality of rejection is withdrawn. Claims 1-8 are pending. No claim is allowed at the present time.

Elected species of progestin is norgestimate and excepiant is lactose (example in Table 7 and claim 8). Elected species is described below:

RN 35189-28-7 REGISTRY

CN Norgestimate

Other steroid hormones as claimed in 1, 4 is notethinedrone of formula

Since elected species was found search was not further extended to other inventions. See MPEP 8.02.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1616

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In Applicant's Claim 1, it is unclear what the meaning of "...wherein substantially all of said steroid hormone..." is. On page 5 of the Specification, it says, "The product comprises at least one steroid hormone in substantially non-crystalline form..."

In Applicant's Claim 1, what is intended by the word "product"?

A clarification is requested.

Claim Rejections - 35 USC § 103

Claims 1-8 stand rejected under 102 (b) and 35 U.S.C. 103(a) over Gast (US Patent 5,858,405). Gast teach a hormonal product which embraces applicant's claimed invention. See the entire document especially examples, claims, lines 11-19 and lines 31-67 in col. 7,

Instant claims differ from the reference in claiming a broader scope of non crystalline steroid hormone.

It would have been obvious to one skilled in the art to prepare additional beneficial compositions for hormone replace therapy and other estrogen deficiencies.

Since the formulation of the elected compound trimegestone with steroid ethinyl estradiol is taught by the prior art, it would be obvious to prepare the compositions as presently claimed. The term "comprising" in claim 1 allows other ingredients.

The transitional term "comprising", which is synonymous with "including," "containing," or "characterized by," is inclusive or open-ended and does not exclude

additional, unrecited elements or method steps. See, e.g., *Genentech, Inc. v. Chiron Corp.*, 112 F.3d 495, 501, 42 USPQ2d 1608, 1613 (Fed. Cir. 1997) ("Comprising" is a term of art used in claim language which means that the named elements are essential, but other elements may be added and still form a construct within the scope of the claim.); *Moleculon Research Corp. v. CBS, Inc.*, 793 F.2d 1261, 229 USPQ 805 (Fed. Cir. 1986); *In re Baxter*, 656 F.2d 679, 686, 210 USPQ 795, 803 (CCPA 1981); *Ex parte Davis*, 80 USPQ 448, 450 (Bd. App. 1948) ("comprising" leaves "the claim open for the inclusion of unspecified ingredients even in major amounts"). See MPEP 2111.03.
